PROGRAM DESCRIPTION

We are proud to be celebrating the fourteenth annual Controversies and Advances in the Treatment of Cardiovascular Disease symposium! The symposium will provide attendees with practical, up-to-date information on complex and controversial cases of cardiovascular disease. The latest data and clinical trial results will be presented and debated by cardiologists, interventionalists, and surgeons, allowing participants to weigh the pros and cons of different approaches and discuss the many standard and emerging hybrid methods of treatment.

The scientific program will consist of sessions focused on treatment options for specific cardiovascular disease states. Each session will include a combination of case presentations, cross-fires, discussion panels, and question and answer periods. A faculty of internationally known leaders in the field has been invited to share their knowledge and experiences with complex and controversial cases.

TARGET AUDIENCE

The conference is designed for cardiologists, cardiovascular and thoracic surgeons, interventional cardiologists, perfusionists, nurses, technicians and those involved in the diagnosis, treatment and care of individuals with controversial and complex cases of cardiac disease.

Controversies & Advances

IN THE TREATMENT OF CARDIOVASCULAR DISEASE

DEADLINE FOR ABSTRACT SUBMISSIONS: OCTOBER 10, 2014

GENERAL ABSTRACT INFORMATION

Submission of original abstracts are being accepted and will be considered for oral presentation and poster display at Controversies and Advances in the Treatment of Cardiovascular Disease at The Beverly Hills Hotel on November 20-21, 2014.

THE ABSTRACT SHOULD BE ORGANIZED AS FOLLOWS:

Type the title in capital letters. Omit abbreviations in the title, but you may use them in the text. Do not underscore the title.

Include the name (first name then family name), institution, city and country of authors. Please underscore the name of the presenting author.

Text of your abstract should adhere to the following guidelines:

- Title: Make as brief as possible indicating the nature of the study
- Concise statement of the purpose of the investigation
- Material and methods of the study
- Summary of the results
- Conclusions supported by the results of the investigation
- Do not include references
